

Competitive Equity Report							
Points are assigned based on state appearances, and/or state and sectional wins. The last 8 teams left in the WIAA tournament.							
Anytime a team exceeds 6 pts on the scale they will be moved to the next division until their points fall to 6 or below in a 3 year period and they have not achieved any pts at the "higher" division							
Can only move up using pts achieved in one division (D4 team moved to D3 can only be moved to D2 using the D3 pts greater >6)							
Moves teams up a division for one or more years.				Moves both public and private schools			
Maximum points achievable in 3 years is 12.....6 is max for three trips to state without a win at state.							
Questions/Comments :							
What sports is there a problem in? How do you determine that: state champions or trips to state or % of private schools involved at the end?							
Should we apply to to one sport as a trial model?							
Should it be less than or more than 3 years?							
Should threshold only apply if you won a state championship during that period?							
Should the threshold be higher or lower than 6?							
Does not necessarily give relief to teams on their "Road to State" unless they continually run into a "state champion level" team							
Does not necessarily solve the "perceived private school advantage" if a private school is moved up and another private school takes their place.							
Teams that would have been moved under the success factor model in the last 3 years:				(Private schools are shaded)
