(Turn over for the answers)

QUIZ ANSWERS

1. FALSE Carbohydrates should be the main energy source in an athlete's diet.
2. FALSE Meat contains no carbohydrates.
3. TRUE
4. FALSE Recent recommendations state that daily intake of sodium be limited to 2300 milligrams per day.
5. FALSE Losing "water weight" (or dehydration) is only a temporary weight loss. With muscles being 70% water, dehydration negatively affects athletic performance. Losing excess fat should be the goal of any weight loss program.
6. FALSE The pre-competition meal should be high in starches or complex carbohydrates.
7. NO! Actually, you can decide this one for yourself.
8. d.
9. d. All of these nutrients play an important role in an athlete's diet.
